

# THE LEADING UNIVERSITY IN UAV TRAINING

## Unmanned Vehicle University's Graduate Spotlight Series

***Hello! Unmanned Vehicle University is excited to announce the launch of the Graduate Spotlight Series. We want to learn all about your experiences in the drone industry and highlight you as a graduate of Unmanned Vehicle University.***

***Below are the key points regarding the Graduate Spotlight Series:***

- Unmanned Vehicle University is looking to conduct a set of interviews and articles focused on graduates and their real-world work experience within the unmanned systems industry
- UVU will be posting these interviews and articles across our social media platforms and on our own blog on the website.
- The goal will be to have these articles picked up by other drone industry platforms and publications as well.
- UVU will be looking to understand your journey in the unmanned systems industry; your successes, failures, lessons learned, exciting projects worked on, future plans, and how your education and training at UVU helped you along that journey.
- These interviews will be conducted with individual students or enterprise clients.
- Please reach back out to us here at Unmanned Vehicle University if you are interested in conducting an interview highlighting your own work and experience in the industry!

### ***Requirements to be Featured in the Graduate Spotlight Series***

- Have successfully completed the Doctorate or Master's degree program in unmanned systems engineering, professional certificate in UAS project management, or the UAV pilot training program
  - o For degree students, can also be within 1 year of completing degree program
- Be currently working in the unmanned systems/drone industry in some capacity applying your UVU education and training
